CURRICULUM

1

Exercise Science, Anatomy and Physiology

16 chapters · 122 classes **100 marks**

- **1 Principles of Human Anatomy Relevant to Exercise** — 5 classes
  - 1.1 Understanding Basic Human Anatomy for Exercise
  - 1.2 Identifying Key Muscle Groups in the Human Body
  - 1.3 Exploring Joint Functions and Their Exercise Applications
  - 1.4 Analyzing the Skeletal System's Role in Movement
  - 1.5 Applying Anatomical Knowledge to Exercise Program Design
- **2 Physiology of Exercise and Acute Responses to Physical Activity** — 5 classes
  - 2.1 Explore the Basics of Muscular Systems in Exercise
  - 2.2 Understand Cardiorespiratory Responses to Physical Activity
  - 2.3 Identify Immediate Hormonal Changes During Exercise
  - 2.4 Examine Energy Systems Utilized in Different Intensities of Activity
  - 2.5 Analyze the Nervous System's Role in Exercise Regulation
- **3 Biomechanics and Mechanics of Movement** — 5 classes
  - 3.1 Understand Basic Biomechanics Terminology
  - 3.2 Explore Human Movement Patterns and Planes
  - 3.3 Analyze Forces and Their Role in Movement
  - 3.4 Identify Common Biomechanical Principles Applied in Exercise
  - 3.5 Apply Mechanics Concepts to Improve Exercise Techniques
- **4 Principles of Training and Exercise Prescription** — 5 classes
  - 4.1 Understand Key Training Principles
  - 4.2 Explore the FITT Principle in Exercise Design
  - 4.3 Analyze the Role of Specificity in Training
  - 4.4 Examine the Importance of Progressive Overload
  - 4.5 Apply Exercise Prescription to Fitness Goals
- **1 Understanding Skeletal Muscle Structure and Types** — 4 classes
  - 1.1 Explore the Basic Structure of Skeletal Muscle
  - 1.2 Differentiate Between Types of Skeletal Muscle Fibres
  - 1.3 Investigate the Role of Skeletal Muscles in Movement
  - 1.4 Apply Knowledge of Muscle Types to Weightlifting Techniques
- **2 Muscle Functionality and Neural Activation in Weightlifting** — 4 classes
  - 2.1 Exploring Muscle Fiber Types and Their Roles in Weightlifting
  - 2.2 Understanding Neural Pathways and Their Influence on Muscle Activation
  - 2.3 Analyzing the Neuromuscular Coordination During Lifting Exercises
  - 2.4 Applying Knowledge of Muscle Function to Optimize Lifting Techniques
- **3 Muscle Group Synergies and Functional Movements in Lifting** — 4 classes
  - 3.1 Explore Muscle Group Synergies in Lifting Movements
  - 3.2 Identify Functional Movement Patterns for Effective Lifting
  - 3.3 Analyze the Role of Stabilizer Muscles in Lifting Techniques
  - 3.4 Apply Muscle Symbiosis to Enhance Lifting Performance
- **8 The Skeletal System and Joint Types** — 10 classes
  - 8.1 Bones of the Axial and Appendicular Skeleton
  - 8.2 Bone Types and Their Functions
  - 8.3 Bone Growth and Remodelling Under Load
  - 8.4 Classification of Synovial Joints
  - 8.5 Joint Structure Ligaments and Cartilage
  - 8.6 Planes and Axes of Movement
  - 8.7 Joint Actions and Range of Motion
  - 8.8 Common Joint Variations in Clients
  - 8.9 Reading Joint Movements During Exercise
  - 8.10 Naming Joint Actions in Client Records
- **9 The Cardiovascular and Respiratory Systems** — 10 classes
  - 9.1 Structure and Function of the Heart
  - 9.2 Blood Vessels and Blood Flow
  - 9.3 Blood Pressure Basics and Safe Ranges
  - 9.4 Resting and Exercise Heart Rate
  - 9.5 The Respiratory Tract and Lung Function
  - 9.6 Gas Exchange at Rest and in Exercise
  - 9.7 Breathing Patterns During Different Efforts
  - 9.8 Oxygen Delivery to Working Muscle
  - 9.9 Measuring Pulse and Breathing in Practice
  - 9.10 Recording Cardiovascular Responses Accurately
- **10 Energy Systems and Fuel Use in Exercise** — 10 classes
  - 10.1 Role of ATP in Muscle Work
  - 10.2 The Phosphocreatine System
  - 10.3 Anaerobic Glycolysis and Lactate
  - 10.4 The Aerobic Energy System
  - 10.5 Fuel Sources Carbohydrate Fat and Protein
  - 10.6 Energy System Contribution by Activity Type
  - 10.7 Fatigue and Recovery Mechanisms
  - 10.8 Oxygen Debt and Post Exercise Recovery
  - 10.9 Matching Activities to Energy Systems
  - 10.10 Explaining Energy Use to Clients Simply
- **11 Nervous and Endocrine Responses to Exercise** — 10 classes
  - 11.1 Central and Peripheral Nervous System Roles
  - 11.2 Motor Units and Muscle Recruitment
  - 11.3 Reflexes and Proprioception
  - 11.4 Balance and Coordination Control
  - 11.5 Hormone Release During Exercise
  - 11.6 Stress Response and Cortisol
  - 11.7 Growth Related Hormones and Recovery
  - 11.8 Blood Sugar Control and Insulin
  - 11.9 Sleep Rest and Hormone Balance
  - 11.10 Applying Hormone Knowledge to Session Planning
- **12 Components of Fitness and Their Measurement** — 10 classes
  - 12.1 Health Related and Skill Related Fitness
  - 12.2 Cardiovascular Endurance Explained
  - 12.3 Muscular Strength and Endurance Explained
  - 12.4 Flexibility and Mobility Explained
  - 12.5 Body Composition Explained
  - 12.6 Power Speed and Agility Explained
  - 12.7 Balance and Coordination Explained
  - 12.8 Choosing Simple Field Tests
  - 12.9 Interpreting Test Results for Clients
  - 12.10 Explaining Fitness Results in Plain Language
- **13 Short and Long Term Training Adaptations** — 10 classes
  - 13.1 Acute Responses Versus Chronic Adaptations
  - 13.2 Cardiovascular Adaptations to Training
  - 13.3 Muscular Adaptations to Training
  - 13.4 Bone and Connective Tissue Adaptations
  - 13.5 Metabolic Adaptations to Training
  - 13.6 Timeline of Visible Training Progress
  - 13.7 Detraining and Loss of Fitness
  - 13.8 Overtraining Signs and Prevention
  - 13.9 Plateaus and Why They Happen
  - 13.10 Setting Realistic Expectations With Clients
- **14 Exercise Across the Lifespan** — 10 classes
  - 14.1 Exercise for Children and Adolescents
  - 14.2 Exercise for Young Adults
  - 14.3 Exercise for Middle Aged Adults
  - 14.4 Exercise for Older Adults
  - 14.5 Changes in Muscle and Bone With Age
  - 14.6 Exercise and Pregnancy Basics
  - 14.7 Exercise After Childbirth
  - 14.8 Adjusting Intensity by Age Group
  - 14.9 Safety Limits for Each Life Stage
  - 14.10 Planning Sessions for Mixed Age Groups
- **15 Exercise Considerations for Common Health Conditions** — 10

2 Client Assessment, Screening and Consultation

16 chapters · 120 classes **100 marks**

- **1 Understanding Participant Needs and Baseline Assessment** — 5 classes
  - 1.1 Identifying Key Participant Needs
  - 1.2 Exploring Methods of Baseline Assessment
  - 1.3 Analyzing Participant Fitness Levels
  - 1.4 Customizing Fitness Plans Based on Assessment
  - 1.5 Incorporating Feedback to Enhance Group Sessions
- **2 Designing Assessment Tools for Group Fitness** — 5 classes
  - 2.1 Understanding the Purpose of Assessment Tools
  - 2.2 Identifying Key Components of Effective Assessment Tools
  - 2.3 Exploring Various Types of Assessment Tools for Group Fitness
  - 2.4 Designing Customised Assessment Tools for Diverse Fitness Levels
  - 2.5 Implementing Feedback Mechanisms to Enhance Participant Performance
- **3 Effective Communication of Fitness Assessments** — 5 classes
  - 3.1 Understanding Fitness Assessment Goals
  - 3.2 Recognizing Key Components of Assessment Communication
  - 3.3 Demonstrating Techniques for Delivering Clear Assessment Feedback
  - 3.4 Engaging Participants Through Active Listening
  - 3.5 Applying Effective Communication in Real-Life Fitness Scenarios
- **4 Feedback-Driven Session Planning and Modification** — 5 classes
  - 4.1 Understanding the Role of Feedback in Session Planning
  - 4.2 Collecting Effective Feedback from Participants
  - 4.3 Analyzing Feedback to Identify Participant Needs
  - 4.4 Translating Feedback into Session Modifications
  - 4.5 Evaluating the Impact of Feedback-Driven Changes
- **1 Understanding Fitness Assessments** — 6 classes
  - 1.1 Defining Fitness Assessments and Their Importance
  - 1.2 Exploring Key Fitness Assessment Components
  - 1.3 Identifying Client-Specific Assessment Needs
  - 1.4 Conducting Pre-Assessment Preparations
  - 1.5 Implementing Fitness Assessment Techniques
  - 1.6 Evaluating and Communicating Assessment Results
- **2 Conducting Initial Client Assessments** — 6 classes
  - 2.1 Understanding the Importance of Client Assessments
  - 2.2 Identifying Client Goals and Expectations
  - 2.3 Gathering Health and Fitness History
  - 2.4 Conducting Physical Assessments and Measurements
  - 2.5 Analyzing Assessment Data for Program Design
  - 2.6 Providing Constructive Feedback to Clients
- **3 Interpreting Assessment Results** — 6 classes
  - 3.1 Understanding Key Assessment Metrics
  - 3.2 Analyzing Client Baseline Data
  - 3.3 Utilizing Comparative Analysis Techniques
  - 3.4 Identifying Trends in Assessment Results
  - 3.5 Communicating Findings to Clients
  - 3.6 Formulating Actionable Client Feedback
- **4 Designing Tailored Training Programs** — 6 classes
  - 4.1 Understanding Client Needs and Goals
  - 4.2 Analyzing Client Capabilities and Limitations
  - 4.3 Establishing Baseline Fitness Levels
  - 4.4 Selecting Appropriate Exercise Modalities
  - 4.5 Structuring a Customized Workout Plan
  - 4.6 Implementing Real-Time Feedback for Program Adjustment
- **5 Effective Feedback and Progress Evaluation** — 6 classes
  - 5.1 Understanding the Basics of Effective Feedback
  - 5.2 Identifying Individual Client Needs for Tailored Assessments
  - 5.3 Developing Active Listening Skills for Better Feedback
  - 5.4 Implementing Constructive Feedback Techniques
  - 5.5 Utilizing Progress Evaluation Tools Effectively
  - 5.6 Designing a Feedback Loop for Continuous Improvement
- **10 Legal Duties, Consent and Records in Client Assessment** — 10 classes
  - 10.1 Duty of Care When Assessing Clients
  - 10.2 Informed Consent Forms Step by Step
  - 10.3 Insurance and Professional Limits
  - 10.4 Data Protection and Client Records
  - 10.5 How Long to Keep Assessment Records
  - 10.6 Emergency Action Plan for Testing Sessions
  - 10.7 Cardiac Arrest and Defibrillator Awareness
  - 10.8 Incident Reporting After a Test
  - 10.9 Safe Room Set Up and Equipment Checks
  - 10.10 Case Practice Legal Review of a Consultation
- **11 Health History and Lifestyle Questionnaires** — 10 classes
  - 11.1 Purpose of a Pre Exercise Questionnaire
  - 11.2 Reading Medical History Responses
  - 11.3 Past Injuries and Surgeries
  - 11.4 Current Medication and Exercise Effects
  - 11.5 Family History and Risk Factors
  - 11.6 Lifestyle Habits Sleep and Stress
  - 11.7 Work and Daily Activity Patterns
  - 11.8 Previous Exercise Experience
  - 11.9 Recording Answers Accurately and Securely
  - 11.10 Spotting Gaps and Follow Up Questions
- **12 Screening, Risk Stratification and Referral** — 10 classes
  - 12.1 Principles of Pre Exercise Screening
  - 12.2 Identifying Cardiovascular Risk Factors
  - 12.3 Low Moderate and High Risk Categories
  - 12.4 Contraindications to Exercise
  - 12.5 Conditions Needing Medical Clearance
  - 12.6 Writing a Referral Request
  - 12.7 Working With Doctors and Physiotherapists
  - 12.8 Handling Clients Who Decline Screening
  - 12.9 Reviewing Screening Records Regularly
  - 12.10 Case Practice Deciding to Proceed or Refer
- **13 Goal Setting and Motivation Interviewing** — 10 classes
  - 13.1 Why Clients Join and What They Want
  - 13.2 Turning Wishes Into Clear Goals
  - 13.3 Short Medium and Long Term Goals
  - 13.4 Setting Measurable Time Bound Targets
  - 13.5 Spotting Unrealistic Expectations
  - 13.6 Understanding Barriers to Exercise
  - 13.7 Stages of Readiness to Change
  - 13.8 Questions That Draw Out Motivation
  - 13.9 Agreeing Goals in Writing
  - 13.10 Reviewing and Resetting Goals Over Time
- **14 Body Composition and Anthropometric Measures** — 10 classes
  - 14.1 Preparing the Client for Measurements
  - 14.2 Measuring Height and Body Weight
  - 14.3 Calculating Body Mass Index and Its Limits
  - 14.4 Waist and Hip Circumference Methods
  - 14.5 Skinfold Measurement Basics
  - 14.6 Bioelectrical Impedance Method and Cautions
  - 14.7 Recording Measurements Consistently
  - 14.8 Sensitive Conversations About Body Weight
  - 14.9 Interpreting Results Without Judgement
  - 14.10 Repeating Measures to Track Change
- **15 Cardiovascular and Muscular Fitness Testing** — 10 classes
  - 15.1 Choosing Safe Tests for Each Client
  - 15.2 Resting Heart Rate and Blood Pressure Check
  - 15.3 Step Test Procedure and Scoring

3 **Fitness Training Principles and Exercise Techniques** 17 chapters · 125 classes **100 marks**

- **1 Understanding the Basics of Fitness Training** — 5 classes
  - 1.1 Defining Fitness and Its Components
  - 1.2 Exploring Core Principles of Exercise
  - 1.3 Identifying Key Fitness Training Methods
  - 1.4 Understanding Safety Protocols in Fitness Training
  - 1.5 Applying Basic Fitness Training Techniques
- **2 Developing Effective Workout Routines** — 5 classes
  - 2.1 Understanding Fitness Goals and Assessment
  - 2.2 Designing Balanced Workout Plans
  - 2.3 Incorporating Strength and Cardio Elements
  - 2.4 Tailoring Routines to Individual Needs
  - 2.5 Monitoring and Adjusting Workout Progress
- **3 Introduction to Strength and Conditioning Techniques** — 5 classes
  - 3.1 Understanding the Basics of Strength Training
  - 3.2 Exploring Fundamental Conditioning Techniques
  - 3.3 Identifying Key Muscle Groups and Movements
  - 3.4 Demonstrating Safe and Effective Exercise Forms
  - 3.5 Applying Conditioning Principles in Workout Routines
- **4 Implementing Safe and Effective Training Practices** — 5 classes
  - 4.1 Understanding Fitness Safety Protocols
  - 4.2 Identifying Common Exercise Risks
  - 4.3 Applying Principles of Effective Warm-Up and Cool-Down
  - 4.4 Designing Safe Training Programs for Beginners
  - 4.5 Evaluating and Adjusting Exercise Techniques for Safety
- **1 Understanding Anatomy for Exercise Execution** — 5 classes
  - 1.1 Explore the Basics of Human Anatomy for Exercise
  - 1.2 Identify Key Muscle Groups for Exercise Execution
  - 1.3 Understand the Skeletal System's Role in Movement
  - 1.4 Analyze How Joints and Ligaments Affect Flexibility
  - 1.5 Apply Anatomical Knowledge to Exercise Techniques
- **2 Fundamental Exercise Techniques** — 5 classes
  - 2.1 Understanding the Importance of Proper Form
  - 2.2 Mastering Basic Exercise Movements: Squats and Lunges
  - 2.3 Executing Upper Body Exercises: Push-ups and Pull-ups
  - 2.4 Applying Core Stability Techniques
  - 2.5 Integrating Flexibility and Stretching into Workouts
- **3 Advanced Exercise Variations and Progressions** — 5 classes
  - 3.1 Understanding Advanced Exercise Variations
  - 3.2 Identifying Muscle Groups for Progression
  - 3.3 Designing Customized Exercise Routines
  - 3.4 Implementing Safe Progressions in Training
  - 3.5 Evaluating Impact of Exercise Variations
- **4 Applying Exercise Techniques in Program Design** — 5 classes
  - 4.1 Understanding Fundamental Exercise Techniques
  - 4.2 Identifying Client Needs for Program Design
  - 4.3 Selecting Appropriate Exercises for Different Goals
  - 4.4 Integrating Techniques into Balanced Workout Plans
  - 4.5 Evaluating and Adjusting Exercise Programs
- **5 Coaching Techniques in Fitness** — 5 classes
  - 5.1 Introduction to Coaching Principles
  - 5.2 Understanding Client Needs and Goals
  - 5.3 Designing Effective Coaching Sessions
  - 5.4 Communication Skills for Coaches
  - 5.5 Evaluating Coaching Effectiveness
- **10 Gym Induction and Equipment Orientation** — 10 classes
  - 10.1 Walking a New Member Around the Gym
  - 10.2 Cardio Machine Set Up and Use
  - 10.3 Selectorised Machine Adjustments
  - 10.4 Free Weight Area Rules
  - 10.5 Benches Racks and Cable Stations
  - 10.6 Functional Training Zone Equipment
  - 10.7 Safe Use of Clips Collars and Bars
  - 10.8 Personal Hygiene and Equipment Wipe Down
  - 10.9 Reporting Faulty Equipment
  - 10.10 Delivering a Complete Induction Session
- **11 Warm Up and Cool Down Design** — 10 classes
  - 11.1 Purpose of Warm Up and Cool Down
  - 11.2 Raising Body Temperature Safely
  - 11.3 Dynamic Mobility Drills
  - 11.4 Activation Drills for Key Muscle Groups
  - 11.5 Specific Warm Up for the Main Workout
  - 11.6 Static Stretching for Cool Down
  - 11.7 Heart Rate Recovery After Exercise
  - 11.8 Adapting Warm Ups for Older Clients
  - 11.9 Adapting Warm Ups for Cold Environments
  - 11.10 Timing and Sequencing a Full Session
- **12 Cardiovascular Training Methods** — 10 classes
  - 12.1 Continuous Steady State Training
  - 12.2 Interval Training for Beginners
  - 12.3 Fartlek and Varied Pace Methods
  - 12.4 Using Heart Rate Zones
  - 12.5 Rate of Perceived Exertion Scale
  - 12.6 Treadmill Technique and Safety
  - 12.7 Bike and Rowing Machine Technique
  - 12.8 Cross Trainer and Stair Climber Technique
  - 12.9 Outdoor Walking and Running Sessions
  - 12.10 Progressing Cardio Over Four Weeks
- **13 Lower Body Exercise Technique** — 10 classes
  - 13.1 Bodyweight Squat Technique
  - 13.2 Goblet Squat and Loaded Squat Variations
  - 13.3 Lunge Patterns and Step Ups
  - 13.4 Hip Hinge and Deadlift Technique
  - 13.5 Glute Bridge and Hip Thrust
  - 13.6 Leg Press Set Up and Safety
  - 13.7 Hamstring Curl and Leg Extension
  - 13.8 Calf Raise Variations
  - 13.9 Common Lower Body Faults and Fixes
  - 13.10 Regressions and Progressions for Legs
- **14 Upper Body Pushing and Pulling Technique** — 10 classes
  - 14.1 Push Up Technique and Regressions
  - 14.2 Bench Press Set Up and Spotting
  - 14.3 Overhead Press Technique
  - 14.4 Chest Fly and Cable Press Variations
  - 14.5 Lat Pulldown and Pull Up Assistance
  - 14.6 Seated Row and Bent Over Row
  - 14.7 Rear Shoulder and Upper Back Exercises
  - 14.8 Biceps and Triceps Exercises
  - 14.9 Common Upper Body Faults and Fixes
  - 14.10 Balancing Push and Pull Volume
- **15 Core Stability and Trunk Training** — 10 classes
  - 15.1 Anatomy of the Trunk and Core
  - 15.2 Breathing and Bracing Technique
  - 15.3 Plank Variations and Progressions
  - 15.4 Side Plank and Anti Rotation Work
  - 15.5 Dead Bug and Bird Dog Drills
  - 15.6 Cable and Band Core Exercises
  - 15.7 Safe Spinal Flexion and Rotation
  - 15.8 Core Work for Lower Back Care
  - 15.9 Common Core Training Mistakes
  - 15.10 Building a Ten Minute Core Routine
- **16 Flexibility, Mobility and Stretching Methods** — 10 classes

4

Resistance and Strength Training Techniques

22 chapters · 120 classes **100 marks**

- **1 Chapter 1 — Fundamentals of Weightlifting Mechanics** — 4 classes
  - 1.1 Understanding the Basics of Weightlifting Mechanics
  - 1.2 Identifying Key Muscle Groups in Weightlifting
  - 1.3 Mastering Proper Form and Posture in Lifts
  - 1.4 Applying Correct Breathing Techniques in Weightlifting
- **2 Chapter 2 — Mastery of Core Weightlifting Techniques** — 4 classes
  - 2.1 Understanding Key Weightlifting Principles
  - 2.2 Demonstrating Proper Squat Form
  - 2.3 Executing Effective Deadlift Techniques
  - 2.4 Applying Techniques in a Practical Setting
- **3 Chapter 3 — Advanced Weightlifting Drills and Variations** — 4 classes
  - 3.1 Mastering the Clean and Jerk: Advanced Techniques
  - 3.2 Perfecting the Snatch: Variations for Improved Performance
  - 3.3 Exploring Accessory Drills for Enhanced Stability and Control
  - 3.4 Applying Advanced Drills in Personalized Weightlifting Routines
- **1 Chapter 1 — Understanding Body Mechanics in Lifting** — 4 classes
  - 1.1 Exploring the Principles of Body Mechanics in Lifting
  - 1.2 Identifying Key Muscle Groups Used in Effective Lifting
  - 1.3 Analyzing Correct Posture and Alignment during Lifts
  - 1.4 Applying Body Mechanics to Improve Lifting Techniques
- **2 Chapter 2 — Fundamental Lifts: Techniques and Variations** — 4 classes
  - 2.1 Mastering the Squat: Proper Form and Technique
  - 2.2 Perfecting the Deadlift: Ensuring Safety and Efficiency
  - 2.3 Executing the Bench Press: Building Strength Effectively
  - 2.4 Exploring Variations: Adapting Fundamental Lifts for Goals
- **3 Chapter 3 — Common Errors and Injury Prevention Strategies** — 4 classes
  - 3.1 Identifying Common Weightlifting Errors
  - 3.2 Understanding the Impact of Poor Technique on Injury Risk
  - 3.3 Implementing Strategies to Minimize Lifting Errors
  - 3.4 Applying Injury Prevention Techniques in Daily Training
- **1 Principles of Strength Conditioning** — 6 classes
  - 1.1 Understanding the Foundations of Strength Conditioning
  - 1.2 Exploring Key Muscle Groups and Their Functions
  - 1.3 Analyzing the Role of Neuromuscular Adaptations
  - 1.4 Identifying Effective Strength Training Methods
  - 1.5 Evaluating the Impact of Overload and Progression
  - 1.6 Designing a Balanced Strength Conditioning Program
- **2 Biomechanics and Muscle Function** — 6 classes
  - 2.1 Discovering Basic Biomechanics
  - 2.2 Exploring Muscle Anatomy and Function
  - 2.3 Analyzing Joint Movements and Levers
  - 2.4 Understanding Muscle Contraction Types
  - 2.5 Examining Force Production and Stabilization
  - 2.6 Applying Biomechanics to Strength Conditioning
- **3 Resistance Training Techniques** — 6 classes
  - 3.1 Understanding Resistance Training Principles
  - 3.2 Mastering Basic Resistance Exercises
  - 3.3 Learning Proper Form and Technique
  - 3.4 Implementing Progressive Overload Strategies
  - 3.5 Adapting Exercises for Individual Needs
  - 3.6 Designing Balanced Resistance Training Programs
- **4 Program Design and Periodization** — 6 classes
  - 4.1 Understand the Fundamentals of Program Design
  - 4.2 Explore Key Principles of Periodization
  - 4.3 Analyze Various Periodization Models
  - 4.4 Develop a Tailored Training Plan
  - 4.5 Implement Microcycles and Mesocycles
  - 4.6 Evaluate and Adjust Training Programs
- **5 Advanced Strength Conditioning Techniques** — 6 classes
  - 5.1 Understanding Advanced Strength Conditioning Principles
  - 5.2 Implementing Periodization in Strength Programs
- **1 Biomechanical Principles of Strength Training** — 6 classes
  - 1.1 Understanding Fundamental Biomechanics in Strength Training
  - 1.2 Exploring the Role of Kinetics and Kinematics
  - 1.3 Analyzing Joint Mechanics and Their Impact on Performance
  - 1.4 Examining Muscle Function and Force Production
  - 1.5 Applying Leverage and Torque Principles to Enhance Lifts
  - 1.6 Integrating Biomechanical Insights into Training Program Design
- **2 Advanced Periodization Strategies** — 6 classes
  - 2.1 Understanding the Foundations of Periodization
  - 2.2 Differentiating Traditional and Non-Linear Periodization Models
  - 2.3 Integrating Advanced Block Periodization Techniques
  - 2.4 Designing Individualized Periodization Plans
  - 2.5 Applying Periodization to Enhance Performance Cycles
  - 2.6 Evaluating the Effectiveness of Periodization Strategies
- **3 Explosive Strength and Power Development** — 6 classes
  - 3.1 Understanding Explosive Strength: Concepts and Benefits
  - 3.2 Analyzing Biomechanics for Power Output
  - 3.3 Assessing Current Power Levels: Tests and Measurements
  - 3.4 Implementing Plyometric Training for Explosiveness
  - 3.5 Integrating Olympic Lifts for Power Development
  - 3.6 Designing a Comprehensive Power Training Program
- **4 Techniques for Enhancing Muscular Hypertrophy** — 6 classes
  - 4.1 Understanding the Science of Muscular Hypertrophy
  - 4.2 Exploring Key Variables for Muscle Growth
  - 4.3 Implementing Resistance Training Techniques
  - 4.4 Utilizing Advanced Muscle Isolation Strategies
  - 4.5 Designing Effective Hypertrophy Training Programs
  - 4.6 Monitoring Progress and Adapting Techniques
- **5 Innovative Recovery and Regeneration Methods** — 6 classes
  - 5.1 Understanding Muscle Recovery Mechanisms
  - 5.2 Exploring Innovative Recovery Strategies
  - 5.3 Implementing Active Recovery Techniques
  - 5.4 Analyzing Nutrition's Role in Regeneration
  - 5.5 Assessing Technological Advancements in Recovery
  - 5.6 Developing Personalized Recovery Plans
- **6 Water-Based Exercise Planning** — 6 classes
  - 6.1 Introduction to Water-Based Exercises
  - 6.2 Understanding Hydrodynamics in Exercise
  - 6.3 Designing Effective Water Workouts
  - 6.4 Safety Protocols for Water Sessions
  - 6.5 Adapting Exercises for Different Levels
  - 6.6 Evaluating Client Progress in Water Fitness
- **1 Principles of Strength Training** — 6 classes
  - 1.1 Understanding Muscle Physiology
  - 1.2 Types of Strength Training
  - 1.3 Progressive Overload Techniques
  - 1.4 Periodization in Training Programs
  - 1.5 Safety Protocols in Strength Training
  - 1.6 Nutrition for Strength Development
- **2 Conditioning Methods for Performance** — 6 classes
  - 2.1 Aerobic Conditioning Techniques
  - 2.2 Anaerobic Conditioning Strategies
  - 2.3 High-Intensity Interval Training
  - 2.4 Endurance Training Principles
  - 2.5 Sport-Specific Conditioning
  - 2.6 Monitoring Performance Improvements
- **3 Recovery Techniques in Wellness Settings** — 6 classes
  - 3.1 Active Recovery Methods
  - 3.2 Importance of Sleep in Recovery
  - 3.3 Hydration Strategies for Recovery
  - 3.4 Massage Techniques for Recovery
  - 3.5 Mental Recovery Techniques
  - 3.6 Recovery and Injury Prevention
- **4 Customization for Client Goals** — 6 classes
